

LISTENING TO A PLAYAWAY WITH HEARING AIDS OR WIRELESS EARBUDS

Bluetooth transmitter

charging cord

Aux adapter

1. To charge the Bluetooth transmitter, plug the smaller end (USB-C) of the charging cord into the Bluetooth transmitter and plug the larger end (USB-A) into a computer or other charging port.

2. Give it about an hour to charge. (You can also leave it plugged in and charging while listening.)

3. Once charged, plug one end of the Aux adapter into the Bluetooth transmitter and the other end into the Playaway.

4. Make sure the switch on the Bluetooth transmitter is towards Tx for transmitter mode (rather than Rx for receiver).

5. Hold the power button on the Bluetooth transmitter for a few seconds to turn it on. You should see a flashing red light.

6. When it flashes rapidly, it is trying to pair. Pair to your hearing aids or wireless earbuds using their pairing mode.

7. Make sure your Playaway has a fresh battery. Then press play and start listening!

8. You can adjust volume on both the Playaway (plus and minus on the side) and the hearing aids/wireless earbuds.
